Available Money Reserve

The main object of the Federal Reserve Banking System, of which we are a member, is to make more available the united money reserves of the strong banks of the country.

Even in normal times there come seasonal loan demands of which the average citizen is unaware. The farmer must have money loaned him for planting and crop moving. Interest and tax payment periods each present their special banking requirements.

The Federal Reserve Bank through which a member bank may quickly convert commercial paper into available assets when most needed enables us to meet these needs.
